Authorized to work for any US employer.

Quick Overview

Hello, my name is Sergio, and I am a full stack developer. I graduated from Dalton State College with an associate in computer science. I am now pursuing my bachelor's at Kennesaw State University. I am confident in my programming abilities as well as my ability to communicate and work with others. I enjoy problem solving and can work alone or alongside others.

Contact

I am sure to be a fitting candidate for many locations. If you have any questions or are interested in me or my work, feel free to email me at surgosan@gmail.com or send me a text message at 706-934-2353. I look forward to hearing from you.

Work Experience

UPS - Driver Helper (Seasonal)

Address: 3560 S Dixie Hwy Dalton, GA 30720

Phone Number: 800-742-5877

Date Range: From November 2019 to January 2020

Description: Assisted the driver to deliver packages in a timely manner during the holiday season.

Walmart - Maintenance

Address: 815 Shugart Rd Dalton, GA 30720

Phone Number: 706-281-2855

Date Range: From May 2020 to May 2022

Description: Maintained quality and appearance of the store alone or alongside others as well as responded to accidents and be available to work in other departments.

Education

Dalton State College

Date Range: From August 2020 to May 2023

Degree: Associate Degree in Computer Science

Major: Computer Science

Kennesaw State University

Date Range: From August 2023 to May 2025 (expected)

Degree: Bachelor of Science (BS) in Computer Science

Major: Computer Science

Languages

English: Fluent

Spanish: Fluent

Skills

- Google Suite
- Microsoft Office
- Computer Science
- Data Structures
- Databases
- MYSQL
- APIs
- Software Development
- Full Stack Development
- Front End
- Back End
- Java
- HTML
- CSS
- JavaScript
- Swift
- Vue.JS
- Source Control
- Git
- GitHub
- Bitbucket
- Visual Studio Code
- Xcode
- JetBrains WebStorm
- JetBrains Fleet
- JetBrains IntelliJ Idea

Experiences

Most experiences are personal. These include but are not limited to learning and developing websites in HTML, CSS, and JavaScript independently. These skills have been continuously growing since 2020.

Starting in 2021, web development has begun to include frameworks such as VueJS and databases such as MySQL.

In Spring of 2023, Dalton State Colleges' Intro to Software Engineering class offered the opportunity to collaborate with a team. This involved creating a desktop application featuring a complete front and backend using Java and JavaFX.

During summer of 2023, various programming ideas appeared such as a finance tracking application. The application is built using HTML, CSS, JavaScript, SQL, and MySQL. The application is continuously being worked on.

The Kennesaw State University Autonomous Underwater Submarine group (KSU AUV) recently had a need for a web developer this Fall of 2023. The goal of this group is to create a submersible that can navigate through underwater obstacles on its' own. This has allowed the opportunity to become more comfortable with organizing tasks and setting goals.

Conclusion

I am quite versatile when it comes to website development. I can handle front, or backend and I am willing to learn new tools. I will continue to learn and grow as I study on my own and work as an intern.
